🔗 Professional Summary

I am an AI undergraduate pursuing a B.Sc. in Artificial Intelligence with hands-on experience from internships and real-world projects. Skilled in Python, Data Analytics, Power BI, and modern AI frameworks like TensorFlow, I have built solutions including a voice assistant, AI chatbot, and healthcare analytics system. I aim to apply my expertise in Machine Learning, NLP, and Generative AI to solve complex problems and drive innovation in forward-thinking teams.

Projects

Nova-AI (Voice Assistant) - An advanced AI-powered voice assistant designed to execute system commands, fetch real-time data, and automate tasks using speech recognition and NLP — offering a seamless human-computer interaction experience.

Cardio-Predict (Heart Disease Analysis & Prediction) - Performed in-depth exploratory data analysis on medical datasets and developed predictive models to identify critical heart disease risk factors, enabling early intervention and improved patient outcome forecasting.

Quantum Job Tracker (Dashboard Project) - Developed a specialized dashboard to track quantum computing job roles, emerging skills (Quantum Algorithms, Qiskit, Quantum ML), and global hiring trends. Analyzed structured datasets and visualized demand insights to support career planning in the quantum technology domain. Built using Python, data analytics, and dashboard design principles.

Internship

VaultOfCodes – Python Internship - Completed a hands-on Python internship focused on developing automation scripts, managing data, and solving practical problems using core programming concepts.

Deloitte – Data Analytics Virtual Job Simulation - Applied data analytics techniques to address real-world business challenges, generating insights and building dashboards to support data-driven decision-making.

Power BI – Short-Term Internship - Designed interactive dashboards and visualized KPIs, gaining practical experience in deriving actionable insights from business datasets using Power BI.

Technical Skills

- Languages: Python, Java, C, DSA
- ML Frameworks: TensorFlow, Scikit-learn, Prompt Engineering
- Data Tools: NumPy, Pandas, Matplotlib, Seaborn, EDA, Data Cleaning, Excel, Power BI
- Cloud & DevOps: AWS, Azure, Git, GitHub
- APIs & Frameworks: Flask, FastAPI, Streamlit
- Databases: SQL, MongoDB
- Other Tools: Jupyter, VSCode

Certifications

- IBM + Simplilearn: AI & Machine Learning (2025)
- RPA Automation Anywhere: Essentials Automation Professional (2025)
- Deloitte: Data Analytics (2025)
- Infosys Springboard: NLP and Deep Learning (2025)
- Cisco: Python (2025), C Language (2024)

Education

B.Sc. – Artificial Intelligence, Aditya Degree College (2023-2026) | CGPA: 8.21

Intermediate (MPC), Sri Chaitanya Junior College (2023) | 64%

SSC, Sri Srinivasa High School (2021) | 97.33%

Achievements

- 🏆 Won First Prize at Amaravati Quantum Valley Hackathon for developing an innovative AI solution.
- 🏆 Achieved First Prize at Project Expo with *NOVA Voice Assistant*, an AI-powered assistant designed for intelligent task execution and seamless user interaction.
- Applied Generative AI and NLP techniques in multiple hackathon projects, including Amaravati quantum valley hackathon.

Soft Skills

Problem Solving | Communication | Team Collaboration | Analytical Thinking |

Adaptability | Learning Agility

Languages

English | Hindi | Telugu
